

# healthy community GRANTS

## GRANTS

### Neighbourhood Grant

Neighbourhood grants are short-term grants to assist individuals and community groups to connect and engage residents through health and wellness activities – because change happens one step at a time.

### Community Grant

Help build a better tomorrow. Community grants are multi-year, big-picture projects to assist in shaping the “healthiest community possible”. This grant values innovation, collaboration, and out-of-the-box thinking from community organizations looking to implement large scale projects.
