

2021 REPORT TO DONORS

The Impact of Your Donations

Your gifts ensure the best possible
health care for our community.

This report highlights the contributions made
by you, and others, during the 2020 year.

PEACE ARCH
HOSPITAL
FOUNDATION

Expansion Updates

Getting ready for an exciting new chapter

About the Project

Peace Arch Hospital is undergoing a \$91 million multi-phase renovation project that includes the expansion of the Emergency Department and Surgical Suites along with the relocation and upgrading of the Medical Device Reprocessing department.

The new extension is a significant increase of space along with redesigned work and patient flow. The expanded Emergency Department will support our teams in continuing to provide quality care, in spaces better designed to meet the needs of patients. The new Surgical Suites will replace

three existing operating rooms with five new ones providing more surgeries for patients closer to home. The relocation of the Medical Device Reprocessing department closer to the Surgical Suites will provide improved access, infection control, and safety for patients, physicians, and staff.

PHASE 1

Projected to be complete Fall 2021 and includes the expansion of the Emergency Department, the perioperative area and the Medical Device Reprocessing department.

PHASE 2

Projected to be complete Summer 2022 and includes the renovation of the old emergency space and the expansion and relocation of Surgical Day Care, which includes one additional procedure room.

ER Construction Update

NEW! The Paul Bennett Staff Lounge, named in honour of the beloved surgical nurse whose life was taken in 2018, will provide a safe space that medical staff can use to nurture the many important aspects of being a healthcare professional outside of primary care spaces.

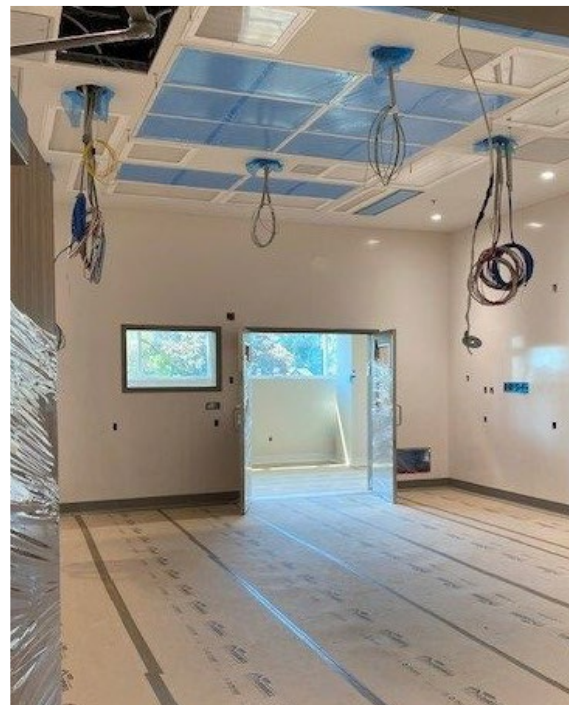

Project Highlights

The hospital's clinical operations teams are finalizing service delivery plans for emergency, surgical, and Medical Device Reprocessing services in the new building. Services will increase as follows:

- Sophisticated ventilation systems, an in-suite sterile core, and dedicated AnteRooms are now included as part of the expansion to aid in infection control and to prevent the spread of hospital-acquired diseases. This will give medical teams a space to safely remove contaminated items before returning to non-contaminated spaces. Separating contaminated and non-contaminated areas in a hospital is essential to prevent the spread of disease and hospital-acquired infections.
- The surgical area will be more than twice the size as the existing space and will include five new operating rooms — an increase from the current three — and a 10-bed post anesthetic care unit. In Phase 1, surgical volumes will be similar to what we see today with the exception of the cataract service, which will increase to five days a week.
- The Medical Device Reprocessing department will be three times larger than the current space with substantially enhanced workflow to improve infection control practices.

If you have any questions, we would love to hear from you!

You are our lifeline

Your support has been our lifeline.

It is not just medical officers or political leaders that can provide reassurance and assistance to our community. It is the everyday heroes at Peace Arch Hospital who have been protecting — and will continue to protect — our most vulnerable patients. And for them, donors like you are frontline heroes too. From the bottom of our hearts...Your support has been essential.

With the help of donors like you, we were able to initiate our COVID-19 Emergency Fund last year. This supplied Peace Arch Hospital with the funds necessary to provide our healthcare workers with immediate comforts and needs like food, hotel, and respite stays. In addition, it provided Peace Arch Hospital with the ability to purchase any critical equipment, medical devices, or additional necessities as needs arose during the pandemic. We could not have done it without your support!

Every gift from you, and others, has had a positive outcome on the entire Peace Arch Hospital campus and surrounding community, especially during the COVID-19 crisis. And we know that these positive outcomes will last well beyond the pandemic's destructive wake. Together, we can ensure that our community remains the healthiest community possible for many years to come.

We know this because our community has demonstrated time and again that we can overcome anything if we help each other when it is needed and give back when we can. As we settle into a new season, one of hope and relief, we raise our glasses to you and the bright days ahead of us! Thank you for your continued support.

"The overwhelming support from people in the community and friends has been a great feeling during this whole situation. From food deliveries and donations, I have never seen such an outpouring of encouragement for what we do at this hospital. That support has definitely helped give me the drive to go to work and try to keep everyone safe, even with the realization that I am risking the health of myself and my family every time I step through the hospital doors."

— DR. JERROD HENDRY,
ER PHYSICIAN

THANK YOU

Our community is thriving because of people like you!

The impact of dollars from donors like you stretches well beyond the hospital campus, creating the healthiest community possible and providing granting programs to members of the White Rock and South Surrey area, and employees of Peace Arch Hospital and Fraser Health.

The following grants were provided in 2020 thanks to your generous support!

HEALTHY COMMUNITY GRANTS

This has offered financial support to viable projects, programs, and initiatives that enhance the health and wellness for those living in the White Rock and South Surrey area.

RAPID RESPONSE GRANTS

The Rapid Response Grant (RRG) was activated to respond to the ever-changing needs of our community during times of uncertainty or crisis, providing rapid financial assistance to those working diligently to aid our community. It provided urgently needed funding to support programs, services, and activities to assist in alleviating effects of events like COVID-19 that caused large scale community impact.

PEACE ARCH HOSPITAL & FRASER HEALTH COMMUNITY GRANT

Open to Peace Arch Hospital and Fraser Health employees currently working in the White Rock and South Surrey region, this grant was created to support initiatives to enhance the hospital campus and to fund special projects.

PAHF STAFF EDUCATION GRANT

This grant aims to provide innovative professional development opportunities to Peace Arch Hospital or Fraser Health Community employees working in the White Rock and South Surrey community. 2020 funding allowed for eight new individuals to receive advanced professional development through conferences, seminars, and educational workshops.

ORGANIZATIONS THAT HAVE BENEFITTED FROM OUR GRANT FUNDING IN 2020 INCLUDE:

Peace Arch Hospital: Oceanside Unit
 Peace Arch Hospital: Emergency Department
 Peace Arch Hospital: PAH Foundation Lodge, Long Term Care
 Peace Arch Hospital: Hogg Pavilion
 Peace Arch Hospital: Weatherby Pavilion
 Peace Arch Hospital: Mental Health and Substance Use
 Peace Arch Hospital: Clinical Operations
 Peace Arch Hospital: Multi Departments
 Peace Arch Hospital: Equipment for COVID-19 Testing Site
 Peace Arch Hospital: Outpatient Rehabilitation iPad Program
 PAH Foundation Lodge: Hospice
 Peace Arch Hospital: 6N Medicine
 Access to Insight Mindfulness Training Foundation

'Zippy' the UVGI Robot

Killing harmful viruses one zap at a time!

Last year, donors like you helped provide an additional layer of infection control by funding the purchase of a new Ultraviolet Germicidal Irradiation Unit (UVGI Robot). The Ultraviolet Germicidal Irradiation Unit (UVGI Robt) – lovingly named 'Zippy' – was instrumental in our defense against the second wave of COVID-19 cases last fall and winter. And today, it continues to keep your hospital stay as clean as possible.

Think of it as a germ-zapping robot. It kills viruses, bacteria, and fungi. And it helps get rid of viruses like C.Diff or COVID-19. Even after a deep cleaning with bleach and other disinfectants, the UVGI robot can reach and eliminate any remaining harmful bacteria and viruses. Every single day, this helps save patient lives. Best of all, we have been able to use the robot in the ICU, in PAH Foundation Lodge, in operating rooms, and many other critical areas of the hospital.

"[Zippy] is essential to keep our hospitals as clean as possible," said Dr. Jean Lauzon, Peace Arch Hospital's Medical Director. "Even after a deep cleaning with bleach and other disinfectants, the UV Robot can reach and eliminate any remaining harmful bacteria and viruses. Every single day this could save a patient's life."

"This is a truly impactful gift for our community," said Stephanie Beck, Peace Arch Hospital Foundation's Executive Director. "Having a UVGI Robot at Peace Arch Hospital is a game-changer for treating and caring for our patients during a pandemic. We are so appreciative of our community's generosity."

COVID-19 continues to threaten us all, but Zippy the robot will continue to protect Peace Arch Hospital, saving lives today and well into the future!

Leaving a Legacy

"The true meaning of life is to plant trees under whose shade you do not expect to sit"

– NELSON HENDERSON ON LEAVING A LEGACY

Many of our donors support the Foundation with a legacy gift (a gift in their will) to show their appreciation for the care they or a loved one has received. Their gift completes a circle of care for each other that goes on to benefit so many other people in our community. The Weatherby Circle honours and celebrates these extraordinary individuals who have kindly supported Peace Arch Hospital Foundation with a gift in their will.

"Leaving a gift to the hospital it has made me proud that I am able to do it. I believe it's important for all of us to try to leave a legacy to our hospital. It will be remembered by our children and grandchildren, and for the many people who are still moving here and will be for the years to come."

– EVA, LEGACY GIVING DONOR

Ask us about special recognition on our 'Tree of Life' – Coming soon!

Creative ways to give include Gifts of Property, Gifts of Securities, Gifts in your Will, Gifts of Registered Funds and TFSAs, Gifts of Life Insurance, and more.

Through your generous donations

We've purchased these items and more...

MINI PORTABLE C-ARM X-RAY – \$90,000

The Emergency Department (ER) is an unpredictable and ever-changing environment. We see all types of patient presentations from strokes to heart attacks, broken bones, open wounds, and other life-threatening accidents. To help patients, medical teams must work quickly!

With the ability to tell our medical team immediately if a patient has a sprain or fracture at the exact point of care in the ER, this device results in a quicker diagnosis and treatment, and better care for emergency patients overall. Two neighbors, both anonymous longtime donors, challenged each other to make this generous gift. Our heartfelt gratitude goes out to these anonymous donors — you know who you are!

THREE ENDOSCOPIC CAMERAS – \$60,000

These small-but-mighty cameras provide detailed images inside the body, helping doctors diagnose problems and create effective treatment plans.

“The techniques we can use now due to new equipment and technology have evolved so much, and this makes surgery safer for the patients and more ergonomic for the surgeons.” – DR. CHERYL WILSON

OLDER ADULT GERIATRIC-FRIENDLY STRETCHER – \$12,000

With special pads and sensors designed to meet the needs of older adults, this stretcher will help identify and prevent issues that may develop or worsen during their hospital stay. The seniors that come through our doors are dedicated members of our community – just like you! Many of them are donors, or volunteers, parents, grandparents, and so much more. They deserve the best, most comfortable care possible. Thank you for making it possible!

and pledges in 2020,

MOBILE LIFT – \$8,800

This lift helps to safely transport or re-position seniors, while also accommodating those who may be sensitive to under arm pressure. If we've learned anything over the course of the COVID-19 pandemic, we know that it's the little comforts that make all the difference. Especially over the last year, when it has been tough for families to travel, care for one another at home, or make visits to healthcare facilities. This mobile lift has helped improve seniors' overall experience at Peace Arch Hospital.

"Thank you for every contribution to the Foundation. This has helped us provide incredible care to everyone – young and old!"

– DR. ANDREW COLLINS, PALLIATIVE CARE PHYSICIAN

BED BLANKET WARMER – \$7,500

The risk for severe illnesses like COVID-19 increases with age, with seniors at the highest risk. And during last year's cold winter months, things like heart attacks, high blood pressure, pneumonia, and falls were more common – especially for seniors! This machine now helps pre-warm blankets for seniors, benefitting them psychologically as well as prepping them for surgery and relieving pain.

"I've seen men, women, and children of all ages require quick diagnosis and treatment during emergency situations. I've seen how important it is to stay prepared with up-to-date life-saving equipment. And, with a grateful heart, I've seen our community step up to provide much-needed support and comforts for health care staff like me throughout the pandemic. Thank you!"

– MEGAN LUM, CLINICAL NURSE EDUCATOR, PEACE ARCH HOSPITAL

Thank you for your ongoing dedication and support!

PEACE ARCH HOSPITAL FOUNDATION is honoured to celebrate the generosity of individuals, corporations, and organizations who are our Ambassadors and give generously to advance our mission of enhancing Peace Arch Hospital and the health and wellness of our community. In recognition of their valued support we invite all donors that have given \$100,000 or more in their lifetime or \$10,000 in a year to be members of our Ambassadors Circle. Their spirit of giving back makes an impact on having a premium health care centre for everyone in our community.
